## **EiKO GLOBAL ANNOUNCES EXPANSION OF CANADIAN OPERATIONS**

SHAWNEE, KS (April 30, 2018) – EiKO Global, LLC is pleased to announce an expansion to its Canadian operations with a new distribution facility in Calgary, Alberta and additional sales support to enhance the company's rapid growth and better serve the company's distribution partners in Western Canada.

The new 13,000-square-foot facility will be fully operated by EiKO staff. David Harrison, previously the Warehouse Supervisor at EiKO's Canadian headquarters in Barrie, Ontario, has relocated to Calgary to serve as Facilities Manager.

"David's expertise in EiKO's operations and understanding of product demand and distribution will allow our new facility to seamlessly enter our distribution stream and ensure the facility operates according to EiKO's high standards," said Stephen Lee, General Manager of EiKO Canada.

Heidi Rudyk, previously an Account Representative in Southern Ontario, has relocated to Vancouver to serve as an Account Representative in British Columbia.

"We have experienced great success in Heidi's Ontario region and we are confident the same will be seen in BC as well," said Greg Cober, National Sales Manager.

In addition to western expansion, EiKO will be adding an additional 20,000 square feet of warehouse space to its headquarters by November.

"EiKO has seen rapid expansion in recent years, in large part due to a constantly growing sales force, support from strong manufacturer representatives within the industry and quality products," said Lee. "The expansion of our Barrie facility will allow EiKO to better serve our devoted customer base in Central and Eastern Canada and the increased demand for our products in these areas."
